WHY UNIVERSAL YARN DYEING?

- Extensive research and development has been conducted and effective solutions have been implemented to address and eliminate the most frequent yarn dyeing quality problems which are.
 - significant decline in yarn strength
 - patta problems
 - uneven dyeing
 - color bleeding
 - batch to batch shade variation
 - harsh hand feel
 - knotting
 - azo detection
 with Universal Yarn Dyeing you can be rest assured that you will not have to face such issues.
- we use the best chemicals and dyes from world famous companies like
 - Huntsman, Switzerland
 - Dr. Petry, Germany
 - Dystar, Germany
 - FU Colour, Indonesia
 - Denimistf, Archroma
 - EU. turkey
- Our production and quality staff is comprised of mostly young and dynamic textile engineers. This provides a platform for drive and innovation. Our senior staffs include technical experts from foreign companies whose primary focus in on system efficiency and dyed yarn perfection.
- One stop service, our marketing and customer services team work as outsourced merchandisers for our customers. That is based on product requirement we will handle all the associated services giving zero headache to our client.
- Sample support, we have 15 sample machines versus 15 bulk dyeing machines. We understand the importance of sampling in the current era where garments factories are always falling behind on schedule due to sampling delay.
- We are also producing sewing thread for our customers and our quality is at par with Coats and Total Thread. Our prices are more competitive.
- Uninterrupted Gas is available for power-generator & boiler system.
- Easy delivery due to recently completed form Dhaka to Tangail 8 lane high way road.
- Safety and security is better as the factory is located inside the BSCIC Industrial estate. You are not likely to face any major issues regarding quality, timely delivery and raw material security while doing business with Universal Yarn Dyeing.

Total Dyeing Machine = 30 Sets
Dyeing Capacity= 12 tons/ Day

Sewing Thread Production = 25,000 Cones/Day
Filament Production = 1,000kg/Day
